

## bigtincan hub for Microsoft SharePoint®

### Taking Microsoft SharePoint® Content Mobile

bigtincan hub™ for Microsoft SharePoint® enables an enterprise to organize and securely distribute content to any mobile device with all the productivity tools mobile users need to interact with content and share.

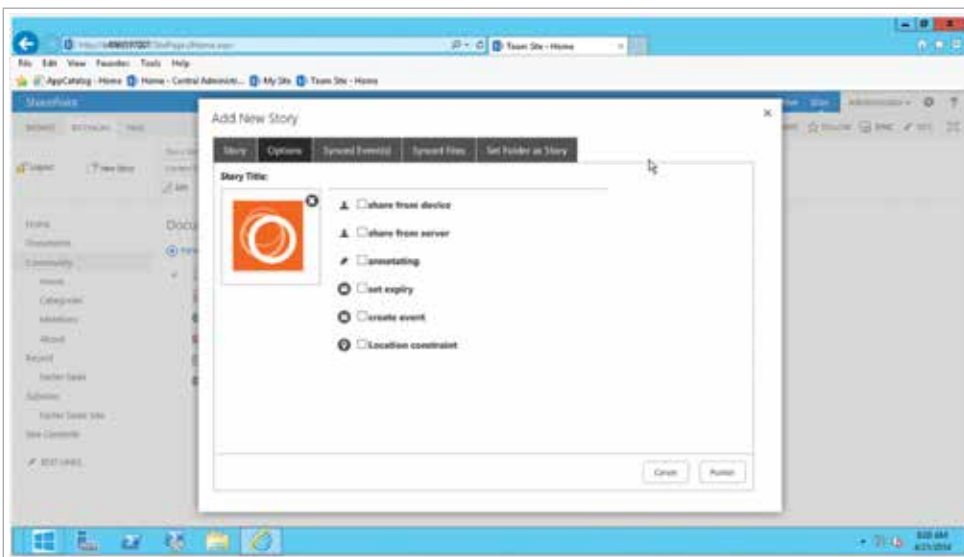

bigtincan hub syncs content from Microsoft SharePoint to any mobile device in a fast, easy, secure and powerful way — extending the value of an organization's investment in Microsoft SharePoint.

Publishers can continue to publish within Microsoft SharePoint without having to change the way they operate.

With bigtincan hub, Microsoft SharePoint administrators can allow for both the automatic syncing of any changes in documents published to Microsoft SharePoint and the individual publishing of selected SharePoint content directly to iOS, Android mobile devices or HTML5 based apps.

### Solution

Need to deliver content stored in Microsoft SharePoint® to mobile devices instantly and securely? bigtincan hub™ enables IT administrators and enterprise users to easily publish and synchronize content between SharePoint and any mobile devices through bigtincan hub publishing tools.

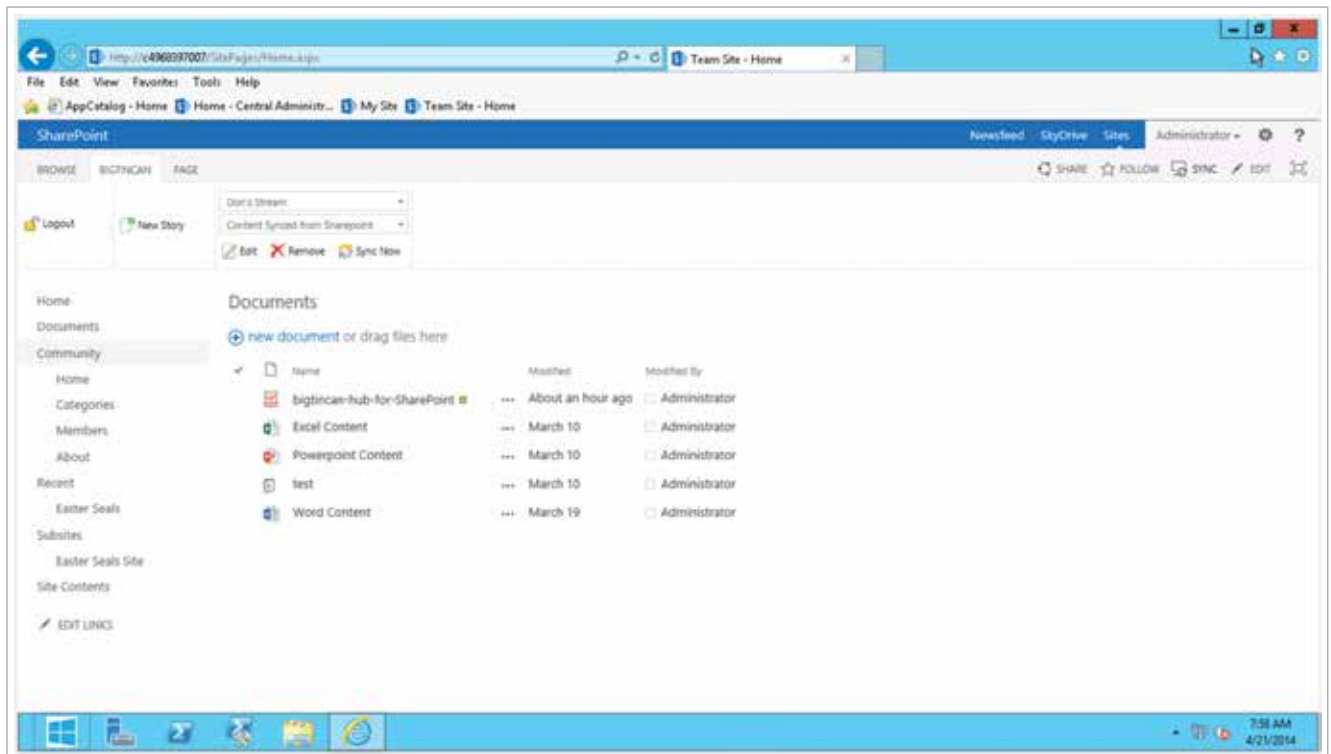

Unlike other approaches that only provide a touch interface to Microsoft SharePoint, bigtincan enables Microsoft SharePoint administrators and mobile users to publish content, sync content and mix content from Microsoft SharePoint with content from other repositories including leading content publishing systems and even from local file access from a users hard drive or network drive.

## How it Works

bigtincan hub for SharePoint is a plug in module that displays right in the SharePoint ribbon, and provides integrated controls which enable the selective sharing and synchronization of document libraries with bigtincan hub.

## One Amazing User Experience

bigtincan hub for Microsoft SharePoint integrates content from multiple content publishing and enterprise content repository systems as well as cloud-based file sync & share systems into a single, amazing user experience. Users are able to easily find, edit, annotate and collaborate on any type of content no matter where it resides.

## Features

- Integrated solution that installs in minutes
- Complete security with full data-at-rest & data in-motion encryption (SSL with AES 256)
